### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 15 includes the limitations that there is a brush head with a first side, a second side and a storage cavity between the two sides. The first side comprises bristles and the second side comprises a luffa. There is a coiled handle member that retracts into the storage cavity.

Fehrenbach teaches a brush with two sides and a cavity between. The first side is bristles and the second side is a sponge. The handle is a hollow tube to allow water to flow from a water source to the cavity in the head of the brush. It would not have been obvious to modify references to achieve the claimed invention of a luffa and a retractable handle because it would destroy the original invention.

Storrs and Messer teach a brush with a retractable handle however fail to teach a second side with a luffa, nor would it have been obvious to combine references to achieve the claimed invention.

Markle, Beck and Frantzeskakis teach a sponge with a retractable handle however fail to teach a second side with a luffa or even a first side with bristles, nor would it have been obvious to combine references to achieve the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
